REPORT

Name of activity	BLOOD DONATION
Objectives of the activity (maximum 40 words)	<p>A blood donation occurs when a person voluntarily has blood drawn and used for transfusions and/or made into pharmaceutical medications by a process called fractionation (separation of whole blood components). Donation may be of whole blood, or of specific components directly (apheresis). Blood banks often participate in the collection process as well as the procedures that follow it.</p> <p>Today in the developed world, most blood donors are unpaid volunteers who donate blood for a community supply. In some countries, established supplies are limited and donors usually give blood when family or friends need a transfusion (directed donation). Many donors donate for several reasons, such as a form of charity, general awareness regarding the demand for blood, increased confidence in oneself, helping a personal friend or relative, and social pressure. Despite the many reasons that people donate, not enough potential donors actively donate. However, this is reversed during disasters when blood donations increase, often creating an excess supply that will have to be later discarded. In countries that allow paid donation some people are paid, and in some cases there are incentives other than money such as paid time off from work. People can also have blood drawn for their own future use (autologous donation). Donating is relatively safe, but some donors have bruising where the needle is inserted or may feel faint.</p>
Organizing departments	ASC THANE NCC ARMY BOYS UNIT
Collaborative institute	-
Date	06-08-2023
Venue	VESAVE MIRA BHAIN DAR
Mode	Offline
Details of Resource person (name ,designation, institution)	POLICE COMMISSAR OF MIRA BHAIN DAR
Key participants	ASC THANE NCC ARMY BOY'S UNIT
Remarkable outcomes/key take-away messages	<p>"Donate Blood, Save Lives."</p> <p>"Be a Hero – Donate Blood."</p> <p>"Every Drop Counts."</p> <p>"Give the Gift of Life."</p> <p>"Share Your Blood, Share Your Love."</p> <p>"Don't Wait, Donate."</p> <p>"A Pint for a Life."</p>

Details of participants	NCC Cadets, NSS VOLANTIAR
Total numbers	16
Outsiders	20
In-house	
	Faculty Members- 3 Students- 50 Male Students: 20 Female Students: 30
Additional information	Donating blood is a critical act of selflessness with significant implications. It preserves lives, aids in medical procedures, and strengthens healthcare infrastructures. Each donation has the potential to assist multiple patients since blood can be separated into various elements, such as red blood cells, plasma, and platelets, each serving specific medical purposes. Given blood is indispensable in emergency situations, surgeries, cancer treatments, and for individuals with chronic diseases. It's irreplaceable and in perpetual demand. Regular donations guarantee an ample supply, and they assume a pivotal role during calamities. Additionally, contributing blood can have health benefits for the donor by lowering the risk of certain medical conditions. This altruistic gesture underscores the profound importance of communities and humanity uniting to create a life-saving impact.
